

## Letter of recommendation

July 1, 2022

To Radosław Stachowiak,

Please accept this letter of attestation that Securitum.PL has provided software security related services to Proton AG in both 2021 and 2022 calendar years.

Proton is satisfied with the work performed by Securitum. We consider Securitum.PL to be a reputable security firm. Your employees are professional, courteous, reliable and dependable. They take security and confidentiality seriously and have consistently demonstrated cyber security expertise. Services that Securitum provided to Proton include:

- Penetration testing of Proton's web, android and IOS applications for PotonMail, ProtonVPN, ProtonCalendar, ProtonDrive and SimpleLogin products.
- On site and remote security audits of ProtonVPN infrastructure.
- Front End and web security training for Proton's software engineers.

Proton AG is a software privacy company whose products include encrypted email, VPN, Drive and Calendar. Proton believes in a private internet where the user, and not big tech, is in control of one's personal information. Product security is an important aspect of our commitment to personal information and data privacy. Thank you for helping ensure that Proton's products are secure.

Sincerely yours,

Andy Yen  
CEO  
Proton AG
